Dear Occupant.

We have been selected by your Building Management to provide pest control service for fleas inside your home. In order to do the best possible job for you we need your help. **Please prepare as follows prior to our arrival:**

- 1. Remove all unnecessary items off the floor such as shoes, toys, papers, etc.**
- 2. Vacuum all carpeted areas and couch cushions. Throw away vacuum bag or rinse canister with hot water and drain in sink. Rinse sink when done.**
- 3. Wash pet bedding and have pet bathed.**
- 4. Everyone, including pets, must vacate the house for a minimum of 2 hours.**

Upon reentering your home, check to see if carpets are still damp prior to allowing kids or pets onto flooring. During cooler months of the year drying sometimes takes more than 2 hours.

After treatment is complete, vacuum once a day for 7 days. This will cause any eggs lying dormant in your carpet to hatch faster and come in contact with the material that we have applied more quickly.

Preparation work must be completed BEFORE our arrival in order for treatment to be done. **NO EXCEPTIONS. If adequate preparation has not been completed prior to our arrival a fee may be assessed by your manager or management company.**

It is not unusual to see flea activity for up to 25 DAYS after our application. If you have issues after 25 days, please contact your building manager.

If you have any questions, our office hours are 8:30am-5:00pm, Monday thru Friday.

Regards,

NORTHWEST PEST CONTROL INC.
